Subject: comments on draft SAB website language for methanol
Attachments: comparison language for SAB website and FR notice and Charge 03212011.docx; Methanol_comparison language for SAB website and FR notice and Charge 03212011_LF edits.docx

John: Thanks so much for putting all of the language in one place. very helpful! It made me realize that the language for the SAB website wasn't as good as some of the language we had developed for the other pieces---so I edited it and attached it below. note that I ONLY edited this piece. I think that the draft charge and the note to ARs and IARs are really fine. Also, not commenting on the FRN here as I know there have been additional edits since this email!

Thanks-getting closer and closer...

Lynn

Subject: Draft FRN for release of Tox Review of methanol (non-cancer)

Here's a draft FRN for the release of methanol (non-cancer) and announcement of a 60-day public comment period. I used John Vandenberg's language provided for the web site as the first paragraph and drafted a second paragraph indicating the non-cancer assessment was split out and that the peer review would be conducted by an EPA contractor.

Please send any comments to me and to Macrina Xavier by Monday morning so we can keep this moving forward. I'm assuming a March 31 release date which is a tight schedule for this FRN. It still needs to go to OGC, through NCEA clearance and to OARS for funding and be hand delivered to the federal register office before 10 am on March 28 for a March 31 publication.

Thanks, Karen
